Pupil Equity Funding at Longridge Primary School

Pupil Equity Funding

As part of the Scottish Government's Scottish Attainment Challenge, Pupil Equity Funding is given to schools each year to help them support children's learning opportunities, particularly children impacted by poverty. The staff at Longridge Primary School are committed to ensuring equity for all children in our school and work hard to help all children achieve success. This year, our school was given £9,720 and this money has been used to support a range of universal and targeted learning opportunities.

Literacy

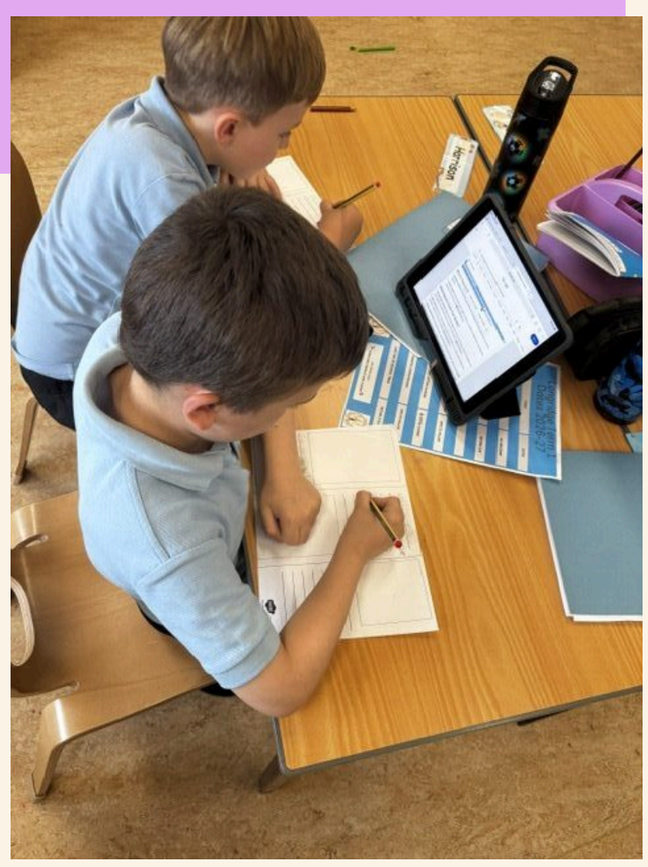

We have planned literacy interventions to develop identified children's :

- Knowledge of Fry's Words
- Blending skills
- Pre-requisite skills for literacy
- Core writing skills

Numeracy

We have planned targeted interventions to develop children's number sense & knowledge, specifically place value.

Health & Wellbeing

Targeted interventions in Health & Wellbeing include:

- Nurture Groups
- Gardening Groups
- Transition Support
- Playboxes
- Sensory Circuits

Cost of The School Day

Parental views have been sought and used to create a Cost of The School Day Action Plan.

All extra-curricular clubs are funded by school to ensure that all children have opportunities for personal achievement.

Participatory Budget

This year we had £380 to spend. The Lundy model was used to plan for our PB spend, this ensures that children's views are heard, respected and acted upon in line with the UNCRC. The children's ideas were then shared with parents and carers to gather their views. This year our school community have decided to spend our Participatory Budget on Outdoor Learning equipment.
